DESCRIPTION

The Apache[®] 4545Evo small format UV LED flatbed printer: Faster, cheaper, better...

The perfect choice for industrial printing, printing on wood and acrylic among many other substrates like anodised aluminium and printing on glass. CMYK + White ink as standard, clear gloss and primer as options or double CMYK for faster printing. The fast 4545 UV flatbed is fast to setup, 450mm x 450mm print area including vacuum bed.

Our full line-up of Apache[®] flatbed printers are using the latest inkjet and curing technology.

Our experts provide full training, guidance and support. Amazing versatility, with incredible spot varnish, fluorescent inks, and embossing effects. Intelligent RIP software, handling complex effects or simple job manipulation. Real time printing info, such as ink usage, print speed and timing. Suitable for a wide range of applications, printing onto a vast array of materials and surfaces.
